Abstract—PC programming has been progressively utilized in different fields. Computer programming plan strategies has been utilized in this paper, Sports Management System has been pre-planned based on use of computer programming hypothesis and technique, under this reason, the real administration of sports and framework programming have been created. The plan of information stream chart was clear and sensible, which has assumed a significant part in programming improvement. It has been demonstrated that the games the board framework has been wonderful made with proficiency configuration, quick handling related issues utilizing programming techniques. In this day and age, programming improvement can be intricate and profoundly serious. A few components add to the intricacy, especially if the product has an electronic UI and is a conveyed application. Notwithstanding the intricacies required during advancement, extra intricacies emerge in upkeep. For instance, the product item may should be altered to coordinate with changing innovation, for example, more up to date forms of working frameworks and equipment. Programming engineers are hence compelled to pick the correct advancement approach while planning and carrying out the product. This report depicts the advancement of an online intramural game administration framework. The item will be utilized by the Recreational Sports Department at the University of Wisconsin-La Crosse and subsequently has a few highlights explicit to the Recreational Sports Department. Be that as it may, the item is effectively extendible and modifiable to suit different games the board exercises. This report depicts the different exercises in the existence pattern of this product. It additionally incorporates the difficulties looked during the turn of events, the current status, and future work on the product.

I. INTRODUCTION

BDSports is a web application for enjoy the sports entertainment. User can enjoy any type of international sports in this application. The sports lover people take the entertainment and refresh their mind through the sports. User can easily buy their desirable product from this application. In our country recently have no such resource without tv for enjoying entertainment from sports. I try to create a platform for taking entertainment from sports. Thus, many tasks we are become depended on web based. We Everyday use internet through any kinds of devicesTechnology is advancing day by day in every sector

of the country and life and it has become an integral part of our lives. Nothing can be done now without technology. Technology has made our lives easier and more beautiful. As far I have describe about the sports management system, that is vastly used for enjoying sports and purchase desirable products.

II. LITERATURE REVIEW

III. PROPOSED METHODOLOGY

To make sure users can easily enjoy their desirable sports without any problem or error. Sports lover entertainment is more important for me. 2. To make sure users' information is more secured in our system.

Fig. 1. Example of a figure caption.

IV. CONCLUSION AND FUTURE WORK

In future, what you bring in your project and the idea of your work.

ACKNOWLEDGMENT

I would like to thank my honourable**Khan Md. Hasib Sir** for his time, generosity and critical insights into this project.
